Contact Lenses: Prescriptions & Policies

A contact lens is a medical device inserted onto the body. If not properly prescribed by an Eye Care Physician, you may not see well. More importantly, if the material is not well-suited to your eyes, it may result in discomfort, inflammation, abrasions, infections, or blindness. A contact lens prescription is a medical prescription treated similarly to a prescribed medication. By law, your contact lens prescription expires **1 year past the date of your contact lens evaluation.** At that time, you will no longer be able to purchase contacts and will need a checkup by your eye doctor to assure the health of your eyes.

Contact lenses purchased at Matossian Eye Associates usually arrive within 2-3 business days unless custom made. You will have a 30 day grace period to pick up your lenses. After that time, they will be returned. Any unopened lenses may be returned to Matossian Eye Associates for credit or exchange within 90 days.

You are welcome to purchase your contact lenses with us or request the written prescription from our optometrist. Thank you for letting us participate in your eye healthcare.
